

# AssetWhere. Data Management Services

## Optimise your AssetWhere Data and maximise your ROI

### MAKE SURE YOUR DATA IS UP TO DATE AND ACCURATE

Nothing destroys user confidence faster than old, incorrect or incomplete data. More alarming still, are the risks prevalent when staff and contractors are relying on that information to perform their work safely and efficiently.

AssetWhere Data Management Services (DMS) is a subscription service that gives schools access to a technical and consulting expertise to proactively manage additions, enhancements, and changes to their database information.

More than half of AssetWhere customers  
use Data Management Services

**AssetWhere.**

## DATA MANAGEMENT SERVICES INCLUDE:

### DATA UPDATES

Request changes to existing plans and information or capture newly constructed buildings and services

### NEW LAYERS

Capture entirely new layers of information, including evacuation routes and tree registry data

### USER TRAINING

Get your team up to speed with AssetWhere training for new or existing staff

### HEALTH CHECKS

Fix pain points and explore optimisation opportunities through consultation with an AssetWhere expert

### COMMUNITY MAPS

Generate bespoke data-based outputs including as Visitor, parking and emergency services maps

### AERIAL IMAGERY

Get a birds-eye view of your school with an aerial image, purchased with your DMS credits

DMS is billed monthly and is available at different levels ranging from 2 to 10+ hours. So whether your school is looking to capture extensive changes or simply maintain and optimise its pre-existing data, there's a DMS service to suit your needs.
