// AssetWhere Facilities Management is great for getting information to and from contractors the school uses."

SCOTT CRAWFORD, FETTES COLLEGE
HEALTH AND SAFETY OFFICER

AssetWhere Facilities Management is the leading cloud-based asset management solution designed for schools. Tightly integrated with AssetWhere, AssetWhere Facilities Management gives schools complete visibility and workflow-based control over the end-to-end life cycle of their assets.

Unite unlimited users in a single, mobile-friendly ecosystem

Powered by CoreVision's myBuildings platform, AssetWhere Facilities Management can be configured to suit organisations of all sizes. It offers schools a vast array of capabilities including:

Total Asset Management

Keep your Asset Registers current and link all activity to monitor operating costs

Mobile-responsive interface

Support unlimited users with an easy-to-use experience across any device

Work Request Management system

Keep on top of maintenance with ad hoc, scheduled and preventative work requests

AssetWhere integration

Build a culture of asset and property management in a single, integrated solution

Contractor Management

Manage contractor inductions, insurances, performance, costs and Safe Method Work Statements

Dashboards & Analytics

Quickly reconcile purchase, expense and replacement data to truly understand the Return on Investment of your assets

Includes everything you need to support end-to-end asset management

Ready to **take control** of your asset management?
