

# AssetWhere Levels

## Building choices for your school

AssetWhere pricing is based on your choice of Level. **Level A** provides the visual index to your school’s site features including roads, paths, sporting ovals, carparks, landscaping, buildings and rooms.

**Level B** extends that visual index to underground services, effectively creating your own “dial before you dig” mechanism to help prevent service disruption and keep your school community safe.

### Level A Inclusions

AssetWhere Level A includes the following property Information.

Building	Building	Landscaping (textual only)	Sports (textual only)
