

One platform.  
One community.  
Education as you  
imagined.

STUDENT INFORMATION PLATFORM

# Zunia is unique.

Zunia is the only student information software – LMS or SMS – which started its life as a student information platform.

Today's incumbent products all began their life as something else – either content management, teacher workflow support, or school finance system. Over time they've followed the human workflows in schools, to become central record systems plus a combination of other functions. Along the way this has required complex development, customisation and integration at every stage.

Today, many of these systems are feature-rich and they are highly reliable in the workflows they support. But the underlying architecture of incumbent

systems has made this growth difficult, disruptive and expensive. They all have inherent limitations in how they operate, change, integrate and grow. The dream of "lift and shift" to the cloud will buy some time. But it cannot eliminate these inherent limitations. Improvements to these systems will only ever be incremental.

**We know that when information systems are designed for people, and data is truly connected, teaching and learning gets better.**

# Zunia is different.

Zunia began life as a core student information platform that is designed to grow and integrate. Its underlying micro-services architecture has been built in the cloud, so that individual parts can be created, integrated and changed without disrupting the whole. We have taken what we've learned about real school workflows and we are building Zunia to support these, with a

navigation and structure that is intuitive – today and in the future.

**Zunia is the Student Information Platform that does the heavy lifting and connects your data, freeing you to create Education – as you imagined.**

# How is Zunia different?

## **One Cloud-native Student Information Platform**

Your single source of truth driving School Management, Finance and Student Learning – with all your essential information at your finger-tips.

## **Easy Compliance Reporting**

Quickly map fields, create and download reports including student residential reports, Naplan and student attendance statistics.

## **Fast Implementation**

Zunia's intuitive design and SaaS deployment model means your team is up and running faster.

## **Open API layer for seamless integrations**

Build your ecosystem around the Zunia student information platform.

## **Great support when you need it**

Our team is here to provide you with personalized and outstanding service. We also offer a range of self-learning tools in our Support Centre.
