

# SEQTA Kiosk

SEQTA Kiosk is an iPad-based location application that integrates with SEQTA Teach's attendance system. Students can 'check-in' at fixed locations around the school – for example, the reception, library, music, sick bay – creating visibility of where your students are at all times.

## How does SEQTA Kiosk support your school?

### Improve accountability while reducing administrative load

Spare your school from uncertainty by understanding your students' movements throughout the campus. Checking in for students is as easy as using the iPad's rear camera to scan their student card. Student check-ins automatically sync with SEQTA Teach, reducing workloads for administrators.

### Protect your students and your teachers

SEQTA Kiosk can be paired with docket printers to provide students with physical receipts to share with their teachers and school leaders. SEQTA Kiosk enables you to build out processes that result in both digital and hard-copy evidence of a student leaving the school grounds.

### Scalable to suit your needs

Record in-class attendance, including late arrivals with class-based deployment, or work out if students are on the premises or not with campus-wide deployment. All information securely and automatically integrates back into SEQTA Teach.

### Many schools are using SEQTA Kiosk to know when students are at:

- ✓ Sick bay
- ✓ Library
- ✓ Reception
- ✓ Music lessons
- ✓ Entering and/or leaving campus

SEQTA Kiosk is available at an additional monthly fee which is based on your school's student numbers. Contact us for more information about SEQTA Kiosk or to arrange a quote for your school.
