

SEQTA Teach

SEQTA Teach is a powerful and collaborative teaching and learning management ecosystem.

The foundation for the award-winning SEQTA Suite, SEQTA Teach helps schools and teachers manage workloads by providing them with the best tools and workflows to perform their jobs.

How does SEQTA Teach support your school?

Empower teachers to excel

SEQTA Teach brings together all of the key tools teachers need to improve student outcomes. Wellbeing, attendance, assessments and reporting are connected by natural teaching workflows, ensuring all actions throughout the software are user-intuitive and reduce administrative time.

Engage your whole community

SEQTA brings parents and carers into their child's education without placing additional burden on teachers. Proactively limit complaints and enquiries by giving parents access to their child's learning information, including lessons, homework, teacher feedback, assessments and reports.

Longitudinal views show the bigger picture

SEQTA has been designed, from the ground up, to give teachers value at every opportunity. All views are natively longitudinal where possible, helping your school identify, understand and proactively respond to student issues and challenges.

SEQTA Teach is available in 4 levels

The key functionality in each level is as per the table.

	APC	Teach	Teach 50	Teach Full
Attendance	✓	✓	✓	✓
Wellbeing	✓	✓	✓	✓
Academic reporting	-	✓	✓	✓
