# Engage Cloud

## THE NEXT STEP IN ENGAGE'S EVOLUTION

It's getting harder and harder to run on-premise systems these days. Why struggle along managing software, servers, disaster recovery and security?

Release your school and re-focus your resources today, with Engage Cloud!

Engage Cloud combines the full benefits of AWS with everything you depend on in Engage.

## FREE YOUR SCHOOL WITH ENGAGE CLOUD AND REALISE THE BENEFITS!

### LOWER TOTAL COST

- No hardware costs
- No hardware maintenance
- No software management
- Redeploy resources

### SECURE AND RELIABLE

- Controlled environment / +99% uptime
- Security monitoring 24/7
- Fewer P1 and P2 support cases
- Central update management

### MORE ACCESSIBLE

- Fully online access 24/7
- Anywhere, any time access
- More users, more often
- Latest version user benefits

### SCALE AND SPEED

- Flex capacity on demand
- Don't pay for constant peak
- Virtually limitless scale
- Consistent performance

# Everything you need in Engage, safe in the cloud!

- **Smooth transition**
- **Configurations**
- **Integrations**
- **Future-proof**

Major institutions around the world have already moved their most critical operations to the Cloud.

Education Horizons and AWS are delighted to offer the cost, convenience, security and reliability benefits of Engage Cloud to our schools.

> **When you look at the Wealth and Personal Banking strategy around scale, resiliency, security, and innovation on the cloud; to enable our business objectives, we had to find the right organization that could partner with us, with the scale and global footprint."**
>
> GAVIN MUNROE, GLOBAL CIO, HSBC

- AWS Cloud's leading security posture
- Education Horizons smooth transition process

## AWS Cloud – Upgrade your school's security posture

AWS delivers the most proven operational experience of any cloud provider in the world through secure-by-design cloud infrastructure that leverages deep automation and +300 cloud security tools.

### TRANSPARENCY

Deeper visibility and automation to help manage risk

### PREVENTION

Enterprise grade security and encryption and industry-leading infrastructure protection

### DETECTION

24/7 monitoring powered by +300 automated security tools

### RESPONSE

Automated incident response capability across all applications

### REMEDIATION

Event-driven automation secures AWS environments in near real-time

AWS's Cloud works with enterprise grade security protocols and encryption techniques built into its architecture – avoiding the need for firewalls and encryption software deployment and management.

The overall AWS Cloud infrastructure is subject to 24/7 expert monitoring powered by leading edge automation. AWS Cloud is also designed to meet the strictest regulatory and industry security requirements as standard with continuous review and updates.

Through our strategic partnership with AWS, Education Horizons offers the most proven and reliable cloud infrastructure for schools.

# Engage Cloud – Managed transition with Education Horizons

Engage is the most comprehensive School Management System on the market - seamlessly integrating school administration, teaching resources, student information tracking, parent engagement tools, financial management and much more into your schools ecosystem.

This means schools need cloud transition that is safe, reliable and protects functionality, data integrity, and integrations – with minimal downtime.

To deliver for schools, Education Horizons has developed a managed migration service that makes the transition to Engage Cloud as smooth as possible – through the following sequence.

**1** **Project scoping stage**

- School completes questionnaire
- Feasibility assessment
- Implementation planning
- Migration ability confirmation

**2** **Migration: facilitate / validate**

- Consultant access – data snapshot securely transferred to cloud
- Stand-up hosted instance for school data testing
- Data and site confirmation

**3** **Configuration: facilitate / validate**

- Confirm modules
- Confirm access
- Confirm connectivity
- Confirm API access and integration

**4** **Cutover and Live Operation**

- Customer booking for migration
- Data migration out of hours
- Activate domain redirections
- Cutover to full live operations

Education Horizons' managed transition to Engage Cloud reflects the depth and breadth of Engage – and the extensive flexibility and configuration schools rely on to meet their unique needs.

By taking this measured approach - and working closely with schools each step of the way - Education Horizons gives schools confidence in their transition to Engage Cloud.
